Q.44 Write a program to create two threads one thread will show even numbers from 1 to 10 and second thread will show odd number from 1 to 10.

Appointments Meetings

Class abc extends Thread

```

{
    public void run()
    {
        int i;
        S.O.P. (" First thread shows Even NO: ");
        for (i=1; i<=10; i++)
        {
            if (i%2==0)
                S.O.P. (" " + i);
        }
        S.O.P. (" Second thread shows Odd NO: ");
        for (i=1; i<=10; i++)
        {
            if (i%2!=0)
                S.O.P. (" " + i);
        }
    }
}

```

class abc1

```

{
    P.S.V.M (String args[])
    {
        abc ob = new abc();
        ob.start();
    }
}

```
